PROFILE

I am a Software Engineer with experience in developing full-stack web applications using Java, Spring Boot, Angular, and PostgreSQL. I specialize in designing RESTful APIs, optimizing database performance, and working in Agile environments. I have a strong ability to deliver secure and scalable solutions under pressure.

TECHNICAL SKILLS

- Strong command of TypeScript
- Object-Oriented Programming
- Agile methodologies
- Java development
- RESTful API design
- PostgreSQL and Oracle database management
- Angular framework
- Spring Boot

EXPERIENCE

Minsait, Remote - Software Engineer

2024-04 - Present

- Collaborated in the analysis of proposed technical solutions based on client requirements.
- Developed scalable and maintainable code, ensuring long-term software stability.
- Coordinated with management, internal teams, and development partners in software design and project tracking.
- Consistently met project deadlines through effective time management and task prioritization.

Baleària, Dénia - Software Development Intern

2023-11 - 2024-03

- Delivered reliable solutions under tight deadlines, combining strong problem-solving skills with effective communication.
- Created automated test scripts to enhance reliability and reduce manual QA effort.
- Implemented user-friendly interfaces for smooth customer experiences.
- Integrated third-party services through complex APIs according to project needs.

EDUCATION

Bachelor's Degree in Computer Engineering

UNED (National Distance Education University)

2020-09 – 2025-07

ACHIEVEMENTS

- Optimized long-running SQL queries, reducing execution time from 3 minutes to 10 seconds by improving logic and implementing multithreading techniques.
- Designed and developed a secure HR employee management system from scratch, integrating SOAP and RESTful services in compliance with data protection standards.
- Independently built a secure and reliable payment gateway integration service, enabling seamless financial transactions.
- Refactored legacy code to improve maintainability, readability, and performance according to modern best practices and scalability needs.

CERTIFICATIONS

- JavaScript Algorithms and Data Structures
- Scrum Essentials
- SQL Certification Course
- Professional Git and GitHub Course

LANGUAGES

- Spanish: Native
- Valencian: Native (C1 certified)
- English: Advanced (C1)
